To the Public. The board of directors of the Memphic Ga ight company desire to declare, in an author alive manner, the future policy of their com any in regard to the sale of ma Our company is possessed of the most comate and ample appurtenances necessary for phis. e manufacture and distribution of an adeuste supply of illuminating gas for the city This is a fact which will become patent to every gas consumer of the dity should another company enter into competition with us within the present week an improvement has been made at our works which will forever secure to this city the credit of possessing a light unsurpassed throughout the globe. Through the same agency we will hereafter be able to correct, in a few minutes, deficiencies in the power of the light we furnish occasioned by cold weather, or from other causes. We do not propose to lose a consumer on account of price. Should another company commence to sell gas at a price lower than the rate fixed by this company, we will at once reduce our rate to a point fifty cents per thousand cubic feet lower than the amount fixed upon by such other company, and will keep desending in the same ratio.

We would remind the public that we desire no assurances or guaranties on the part of our consumers, as we believe that whenever matters come to open competition, the superiority of the light offered by this company to say nothing of inducements in price, will secure a continuance of the patronage it has so long enjoyed.

It is minde the imperative duty of every officer and employe of this company to pay strict attention to the wants and requirement of our patrons, and any lack of courtery of neglood of complaints will subject the offender to severe rebuke or prompt diamissal from our

THIS VESSIL, recently invented, is highly recummended and indersed by leading physicians, containing two spartments, enablin, the physician to examine the contents separately, by which he gains a knowledge of diseases unattainable by the use of the single or common chamber, with the discharges in a mixed state. ALL ADMIT THAT "The mistake of a physician of one's disease may be as dangerous as the disease itself."
Its life value in the sick room is invaluable. With it you exist your physician in defining your disease, by which year life may be saved.
Its convenient shape for common use will ditimately lake the place of the common chamber. For sale by LLOYD, CLARKE & CO.,
